SOUND AND SILENCE IN PERFECT HARMONY

InMotion earphones with Etymotic Research technology deliver a perfect combination of near-perfect sound reproduction and dead-quiet noise isolation. While musicians, audiophiles and acoustic engineers have utilized this (ER) technology since the mid 80's, it is now available to enthusiasts anywhere with the introduction of the new inMotion earphones. Engineered to provide a genuinely accurate music stream, these micro earphones assure smooth treble, clear and natural piano, crisp percussion and rich orchestral music. The earphones are shaped to comfort-fit like earplugs, capturing awesome bass within the ear. Importantly, this earplug design blocks out external sound, allowing lower level listening volume and preventing hearing damage and overload distortion from otherwise excessive noise. Perfect silence for beautiful music. Just listen.

- Superior noise isolation
- Enhanced bass
- Superior noise isolation
- Enhanced bass and high-definition audio modes
- In-line volume control

Sound

Full-spectrum sound from the deepest bass to high-frequency tones.

Isolation

The patented, three-flange eartip delivers advanced external noise reduction for clearer sound at safer volume levels.

Comfortable

With a choice of soft-foam or three-flanged eartips, iM616 earphones are designed for in-ear comfort.

Mobile

The feather-light earphones that go just about anywhere you want to listen to music.

Altec Lansing
inMotion™
 small earphones... Big, Big Sound!
